

In Class Activity Sheet - Welcome Back to Reefs Go Live: A Review of Coral Reefs

Our CCMI scientist needs your help! If you see one of the below creatures (left column) or interactions (right column) during the dive, make sure you label what you see next to it. If you see something during our dive that our underwater educator doesn't see, please raise your hand and let him/her know! Can you identify what it is? Describe or draw it in one of the empty boxes below. If you cannot identify it, describe it to your teacher, who will share with the CCMI scientist to help you identify it!
