

In Class Activity Sheet - Diving off the Wall

You're the scientist! Help our CCMI scientist to identify the changing organisms as he/she moves from the top of the "wall" down the wall to a deeper depth. Using the outline of the wall below, label or draw these organisms according to where you spot them during our dive. Are they on top of the wall? Are they at 10 m, 15 m, or 20 m? If you see an organism that you don't know, be sure to ask our CCMI scientist so that you can include it in your wall! We've given you some examples to help you get started...
