

## Ocean Science Scholars 2023 Need-Based Scholarship Application

### Programme Information

Funding from the Edmund F. and Virginia B. Ball Foundation will support 5 students with an opportunity to participate in a week-long informal science learning programme at the Little Cayman Research Centre. Participants will learn about our coral reef ecosystem and be introduced to the practice of field research alongside our marine science educators. Students will gain a practical understanding of fish and coral identification, the interconnected balance of marine ecosystems, threats to these ecosystems, and how they can make a positive impact. This programme will help CCMI support young Caymanian students advance academically on a track to become proficient young professionals who contribute to protecting marine biodiversity for the future in the Cayman Islands.

### Scholarship Information
