

# Caribbean Marine Ecology Camp (CMEC)

During the CMEC, students focus on tropical marine ecology and conservation. Learning from CCMI scientists & educators, no two days are the same as campers dive, snorkel, and explore a pristine reef system. Students will stay at the Little Cayman Research Centre, a remote field station, and learn first-hand about CCMI's cutting-edge research. Campers gain a certificate of completion for attending the CMEC to add to their CVs as well as a real insight into the industry. The programme also includes fun activities of a summer camp with beach games, kayaking, beach bonfires, and exploring Little Cayman's environment. Divers and non-divers are accepted into the programme. Local scholarships are awarded annually!

Cost  
**USD \$2395**  
per camper

## Age Group

13 - 17 years old

## Dates for CMEC

21st - 27th July 2024
